Leader

School Vice Captain

PROJECTS

Expense Tracker ↗

08/2026 – 08/2026

Expense Tracker is a responsive web application that helps users manage their personal finances. It allows users to record income and expenses, categorize spending, set budgets, and view monthly analytics through interactive charts. Data is securely stored using **Firebase Authentication and Cloud Firestore**, and the application is deployed using **GitHub Pages**.

Neer Band – Women Safety Smart Watch

- Developed a women safety smart watch designed to improve personal security during emergencies. The system enables location tracking and emergency assistance to enhance women's safety in real-world situations.

Technologies Used: HTML, Java, Firebase

My Contribution:

- Developed website components using HTML
- Integrated Firebase for real-time location tracking
- Assisted in implementing safety-related features for emergency response

Zayathon-Redesign

ZAYATHON 2026 is a modern, cinematic hackathon platform built for ZAYA CODE HUB. It features an interactive event website with hackathon domains, timeline, prizes, FAQ, real-time countdown, team registration, and a secure admin dashboard for managing registrations. Built with **Astro, TypeScript, Supabase, PostgreSQL, and Vercel**, the project focuses on strong UI/UX, responsiveness, accessibility, security, and production-ready functionality.
